GOLDMANN APPLANATION TONOMETER

AT 900

The gold standard in IOP measurement

Because it is fast and reproducible, Goldmann applanation tonometry has been the gold standard in tonometry for many decades. It is based on the Goldmann principle – tried and tested during more than 50 years of usage with millions of patients.

Furthermore, thanks to the high precision of manufacturing at Haag-Streit, the Goldmann applanation tonometer AT 900 offers reliable performance over many years without the need for manufacturer maintenance.

TONOSAFE – THE DISPOSABLE TONOMETER PRISMS

Convenient – Safe – Accurate

Tonosafe* avoids the need for time-consuming and laborious cleaning and disinfection without compromising the original Goldmann quality. It has been developed for single use only and thus reliably eliminates the risk of cross-infection even in the most difficult situations. Calibrated to Goldmann standards, Tonosafe delivers accurate results with all Goldmann and Perkins contact tonometers.

*Manufactured by: Haag-Streit UK Ltd, Edinburgh Way, Harlow, Essex, CM20 2TT, United Kingdom

GOLDMANN TONOMETER PRISMS

Excellent optical quality

Goldmann measuring prisms are distinguished by their optical and mechanical performance which allows for fast and reliable measurements in daily practice. They are largely handmade by experienced workers, and are checked for tight tolerances in weight, optical quality, durability and for consistent measurement results.
